

WHAT IS CLAIMED IS:

- 5 1. Nursery care article, in particular a feeding bottle or comforter, comprising a body, a tip for suction intended to penetrate at least partially in an infant's mouth, as well as a member on which the infant's lips abut during suction,
wherein the hardness of the member on which the lips abut is clearly greater
10 than the hardness of the tip.
2. The article of Claim 1, wherein the hardness of the member on which the lips abut is higher than 50 Shore A.
3. The article of Claim 1, wherein the hardness of the tip is included between 20 and 50 Shore A.
- 15 4. The article of Claim 1, wherein the member on which the lips abut and the tip are integral, particularly in that they are made by bi-injection.
5. The article of Claim 1, wherein it is question of a feeding bottle, the tip and the member on which the lips abut belonging to a teat of this bottle.
6. The article of Claim 1, wherein the member on which the lips abut and the
20 tip are mutually independent, at least in translation along a principal axis of this tip.
7. The article of Claim 6, wherein it is question of a feeding bottle comprising a ring adapted to be connected on the body, the member on which the lips abut being integral with this ring, while the tip belongs to a teat of this
25 bottle, which is adapted to be removably fixed, by wedging, between opposite surfaces of the ring and the body.

8. The article of Claim 7, wherein the member on which the lips abut defines, opposite the ring, an orifice for passage of the tip.

9. The article according to Claim 7, wherein the teat comprises said tip, a flange for wedging between the ring and the body, as well as a zone for

5 connection between this tip and this flange, whose shape is adapted to facilitate the movement of the tip, along its principal axis, with respect to the flange.

10. The article of Claim 6, wherein it is question of a comforter, the member on which the lips abut being integral with the body, while the tip is extended by a flange for fixation on the body, an orifice for passage of the tip being made in

10 the member on which the lips abut.
